WAMBU

The  
Good  
Roll.

Mama Wata is the new go-to, sister-label of playful, stainless steel bottles designed by 24Bottles to quench your thirst of funny, easygoing and tongue-in-cheek style!

Comfortable and compact, lightweight and BPA-free, the Mama Wata bottles are your green choice for a clever hydration. The entire volume of CO2 emissions is absorbed by the international reforestation projects supported by 24Bottles.

Available in two models, the lightweight Single Wall and the double walled Insulated Bottle, Mama Wata bottles come in a various range of bright, monochromatic colors and fresh, patterned designs.

---

Notabag is a young, award-winning German brand and represents the same-named product, which was introduced in December 2012 through the Kickstarter crowd-funding platform.

Notabag is a smart combination of a bag and a backpack. It is an environmentally friendly solution that simplifies the active, on-the-go lifestyle.

Notabag founder Adnan Alicusic was inspired to create Notabag during a real life challenge, where a shopping bag on his bike's handle bar almost led to fatal situation in a city traffic.

He found himself stuck between the cars during the busy traffic and the shopping bag made the situation worse by limiting his ability to manoeuvre the bike. Wishing that he had a backpack with him, Adnan started to visualize a simplified solution to transform a bag into a backpack.

<http://www.notabag.com>

The Notabag logo consists of the word "notabag" in a lowercase, sans-serif font. The letter "n" is smaller and positioned to the left of the "o", creating a unique visual identity.

**by Roll'eat**®

From Roll'eat we aim to reduce the consumption of materials with a high environmental impact, such as aluminum foil or plastic bags. It is the first line of products of the company Marcadiferencia S.L. that started in Barcelona in 2006. The company is specialized in developing promotional products for environmental campaigns in companies and public institutions.

The brand offers creative solutions to single use or throw-away articles, promoting wiser consumption and encouraging environmental education. Under the motto "Reuse and Reenjoy", its daily use products combine perfectly functionality, design and originality.

Our creativity has forced us to reinvent our world - Why wrap a sandwich, when we can dress it up? Why stick to a boring lunch box, when we have combined the efficiency of a lunch bag and a placemat into a product that can be used and enjoyed multiple times over?

We are committed to promoting wiser consumption by wasting less and re-enjoying more!

---

Wambu is fully biodegradable and takes about 6 months to compost. Unlike plastic ones, its production does not ask for any harmful oils or chemicals.

Wambu is also naturally anti-bacterial and comes in a fully recyclable box. It does everything your other toothbrush did, without causing any environmental damage. Wambu supports the Plastic Soup Foundation.

**WAMBU**

Every day some 270,000 trees are felled to produce toilet paper, yet still an incredible 2.3 billion people do not have access to safe, clean toilets. That's about 32% of the world's total population! Alarming figures if you ask us.

So alarming, in fact, that they inspired us to develop The Good Roll. A unique concept in toilet paper that tackles both problems at once. A concept that uses 50% of net profits to support the building and improvement of sanitary facilities in developing countries through The Good Roll Foundation and our partners... All while using 100% tree-friendly recycled paper!

And to make it even more attractive, this super-soft, inexpensive, and luxurious designer roll can be delivered right to your doorstep in a colourful packaging that is sure to brighten your day.
